

THE OSWEGO WEST PIERHEAD LIGHTHOUSE

ORIGINAL ACCOMMODATIONS & EQUIPMENT

The Kitchen - Main Floor

Accommodations for 3 in the
bedroom - Main Floor

The basement, located within the Lighthouse's concrete caisson, contained crucial operational equipment. The electrical air compressor, the diesel air compressor and the air tanks for the fog horn; as well as the standby diesel generator, the power distribution panel and the transformer room can be seen above.

The images seen here are from the Robert Gode Collection

The radio room, on the main floor of the Lighthouse, featured a work station for the on duty keeper, as well as the radio beacon equipment and communication's equipment such as telephones.
